

# Secure your business

Cyber crime is becoming one of the biggest threats to a businesses' success...

**40%** of UK companies reported falling victim to on average five attacks, which cost them nearly £330,000 a year <sup>1</sup>

**41%** of companies have over 1,000 sensitive files including credit card numbers and health records left unprotected <sup>2</sup>

Ransomware attacks are growing more than **350%** annually <sup>3</sup>

The average global cost of cyber crime increased by over **27%** in 2018 <sup>4</sup>

Not sure if you need help?

Use our handy checklist overleaf to assess if you need an audit.

## 1 Firewall

- Do you have a firewall set up?
- Do you need a higher level boundary firewall if you have multiple devices on your network?

## 2 Secure settings

- Are your devices set to the most secure settings?
- Do you have passwords that are hard to break?
- Do you need two-factor authentication?

## 3 Access to data

- Do you have administrators and restrict access for general employees?

## 4 Protection against viruses and malware

- Do all devices have anti-virus software installed?
- Do you only use apps from secure sources?
- Can you control where users add apps from?
- Do you understand sandboxing?

## 5 Keep devices up to date

- Are all devices in your business up to date?
- Do you use patching?
- Do you use devices or software that are outdated and not supported by the manufacturers?

If you can't tick all of these boxes, our **FREE Security Essentials Audit** will help you to understand your level of security and the changes you need to implement to protect your business.
