from
£5

Per pupil, per month

based on a class set of iPads, accessories and professional services with a trade in of 3 year old iPads if possible.

Case studies

Find out what the teachers think...

Layton Primary School
Blackpool, 620 pupils

Why choose Apple?

“The quality of Apple products speak for themselves, and having used them in a previous school, I was convinced that if the infrastructure was right, they could have a transformational effect.”

How do the devices benefit your pupils?

“Through using the devices our pupils are encouraged to think about their learning, question their processes and debate outcomes. It builds vital life skills. This is something Ofsted commended when they visited the school.”

How do the devices benefit teachers?

“Teachers have seen a major reduction in workload. They can easily leave voice feedback for pupils, access all lesson plans at the touch of a button, and save time wasted on printing and photocopying.”

How do you finance the deployment of so many devices?

“We utilise some of our pupil premium funding to support the purchase of devices too. We’ve seen a great return on this investment, with pupils from disadvantaged backgrounds excelling.”

What’s the biggest impact of Apple devices?

“The Apple devices have completely changed the operation and results of our school.”

Dalton St Mary’s Primary School
Dalton-in-Furness, 230 pupils

Why choose Apple?

“The devices are functional, easy to use and work well in an education setting.”

How do the devices benefit your pupils?

“The children develop as independent learners due to the ability to work at their own pace. Pupils who have SEND or come from a disadvantaged background have also benefited hugely.”

How do the devices benefit teachers?

“Teachers are freed from laborious tasks to focus on pupil learning, making video guides and explainers and communicating directly with each child through voice notes.”

How do you finance the deployment of so many devices?

“We utilise a range of funding streams including Devolved Formula Capital that is ring fenced for buildings and technology, and our Pupil Premium funding. We’ve also saved in excess of £8,000 on photocopying and printing in three years.”

What’s the biggest impact of Apple devices?

“It’s been a win win for us, it’s truly transformed the school. We have also seen recognition of the success of the approach from Ofsted, who highlight us as a ‘flagship school’ that is ‘trailblazing’ in the area of technology.”
