GBM Does your cloud have a silver lining?

We understand what it takes to get the most out of your IT system, which is why we have integrated our managed and hosting service solutions to create Silver Lining. Silver Lining is a flexible cloud-based hosting service that lets you pick and choose the elements that you need to make your IT work for you.

We know that a smooth running school is imperative, so we have created three services to help. If you need something else, get in touch and we can create a service that meets your needs.

Keeping up with storage, licensing and security requirements is a complicated and time-consuming process for any school. That's why our consultants and engineers can work in partnership with your team to build a service that does as much or as little of this stuff as you want.

CLOUD BACKUP & RECOVERY

We understand how losing valuable data feels, which is why we offer a Cloud-based Backup and Recovery service. With our cloud-based backup and recovery your data is accessible when and where you want it, so you never have to worry about losing important files again. And should the worst happen, our engineers are here to get you back to normal with minimum downtime.

ZULU DESK

ZuluDesk is the latest in cloud-based device management for schools. ZuluDesk has a powerful management system for the IT department to keep track of all devices and manage their use within the school. The management system enables you to set policies and keep track of activities and incidents.

WEB FILTERING

Making sure your students do not stumble across inappropriate content when searching the web can be easily managed through our web filtering service. Our anywhere, anytime filter works across WiFi and cellular networks making it easier to ensure no-one accidentally poses an issue to your school.

What Are The Benefits Of Silver Lining?

- 99.9% availability
- Data stays within EEA borders, offering you guaranteed data sovereignty
- Scalable solution to suit your budget and needs
- Data is housed in an ISO-Accredited ultra-secure UK data centre
