

In today's world why pay for outdated technology?

Tech-as-a-Service allows you to keep your technology completely up-to-date. Source the right technology today, at the lowest price, and remain adaptable and agile for the changes coming tomorrow.

Here are the key benefits to the Tech-as-a-Service Subscription programme (TaaS)

- **Reduced cost of ownership** – Save up to 30% of the total cost of ownership of hardware and software. Plus spread your VAT payment over the term and pay it on a smaller amount.
- **Manage your cash flow** – Control your spend and spread the cost over the useful life of your technology and services.
- **Better Equipment** – Keep yourself ahead of the game with the latest technology. Improve your employees level of satisfaction and productivity, all at a lower cost.
- **More often** – get equipment faster and more often to ensure you get the best from the technological advances available to you.
- **Simplicity** – Put your hardware, software and technology services all on one simple payment (monthly, quarterly or annually).
- **Flexibility** – A subscription still gives you choices, at the end of the programme you can choose to return equipment (and ideally get new), keep equipment longer or even purchase it – So you are not losing the control.
- **Fully compliant** – Take comfort in this being fully compliant with UK State Education Legislation. Tech-as-a-Service is always compliant with this as we have built algorithms into our subscription platform when needed.

Speak to us about buying your hardware, software and services via subscription today, email hello@gbmdt.co.uk or call us on **0161 605 3838**
